To Whom It May Concern:

Westphall Remodeling recently completed an extensive (and much needed) remodel of my 40 year old home. The project was a complete interior renovation of all living spaces from drywall to in-wall plumbing, electrical, insulation, flooring, custom cabinetry, granite counters, and replacement of fixtures. The kitchen and 3 bathrooms were completely gutted, redesigned, and rebuilt. Even a portion of the exterior siding was replaced with stucco. From the early planning stages to obtaining the appropriate permits, selection of materials, coordinating and assuring the timeliness and quality of subcontractor work, the owner of Westphall Remodeling, Brad Westphall, was intimately involved and always available. There was never a lack of communication. Through it all, Brad surely proved to be indispensable. I cannot imagine completing a project of such broad scope without his invaluable guidance. Even his input regarding the aesthetics of my choices helped to calm my anxieties whether everything would truly come together as I envisioned. In the end, the project was completed at the projected cost, on time, and truly all as I had previously only hoped. Happily, my wife is just as pleased. Thus, it is with great pleasure and with not the least bit of reservation that I recommend Westphall Remodeling for your construction and remodeling needs.

Regards,

Minh G. Do, M.D.
